Aster, Giant California Sunshine

Giant California Sunshine Aster

1450 Plants of this new race grow three feet high and bear blossoms on long, stiff stems, admirable for cutting. The individual blooms are enormous, four to six inches in diameter.

The color in these new Asters is startlingly beautiful. A dual tone effect is obtained through the contrasting tints of the disc-like center and the outer or guard petals. In color they vary in shades of Enchantress-pink, Apple-blossom, deep rose, blue, and lavender, but the disc, sometimes light yellow, sometimes blue, adds considerably to the colorful effect of the blooms. In mixture only. Pkt. 20c; special pkt. 75c.

Ageratum, Blue Cap

Ageratum Blue Cap (A)

1070 Blue Cap is the best dwarf Ageratum yet offered. The flowers are larger than those of Little Blue Star and of a deeper and richer color. Annual Canterbury Bell

Giant Antirrhinum (A)
Snapdragons
Improved
Early-Flowering

A truly remarkable improvement in this very popular flower, the result of many years of careful work and selection on the part of the grower. The results obtained are uniformity and trueness of color. The plants grow 2½ feet high, start blooming 3 weeks earlier, and are in full bloom a month ahead of other varieties. Beautiful spikes with an unusually large number of flowers open at one time. Apparently quite rust-resistant because of its earliness.

1143 *Early Brilliant Rose*. Rose-pink.

1144 *Early Golden King*. Bright yellow.

Cosmos [Ⓐ]

Beautiful summer and autumn blooming plants. They produce thousands of artistic flowers, furnishing an abundance of cut blooms for autumn decorations. Should be sown in spring in the open ground, when danger of frost is past or the seed may be started under cover and afterwards transplanted. Plant not less than 18 inches apart in rows or in masses in beds. When the plants are about a foot high the tops should be pinched out to induce a bushy growth. They prefer a rather light, not too rich soil, but do well almost anywhere. North of Philadelphia it is safer to use the early flowering type.

Extra-Early Express Cosmos

2074 Pink. An extra-early single Cosmos flowering in from forty-five to fifty days from the time seed is sown. The plants grow about two and one-half to three feet high. They are covered with medium-sized bright pink flowers. Pkt. 15c; $\frac{1}{4}$ oz. 50c.

Early Colossal or Midsummer Giant Single Cosmos

Seeds sown in the open ground April 27th produced plants that were covered with bloom July 20th, two months before the late-flowering kinds. By careful selection they now have flowers as large as the late-flowering kinds, and will undoubtedly perfect their blooms in the most northerly States.

To get this variety in bloom before frost in the States north of Virginia it should be grown in pots or boxes, so that the roots are confined, thus causing it to flower. Pkt. 10c; special pkt. 30c.

Calendula chrysanthra

Four Newer *Calendulas* [Ⓐ]

1675 *Chrysanthra* or *Sunshine (Novelty)*. An entirely new break in *Calendulas* with flowers that have a striking resemblance to those of a *Chrysanthemum*. The petals are long, wide, and drooping, giving the flower a globular shape. The color is clear buttercup yellow. Graceful, long-stemmed blooms which besides their value in the garden make particularly fine cut flowers. Pkt. 20c; ¼ oz. 75c.

1679 *Campfire (Sensation)*. Extremely large flowers of a rich orange color showing a distinct sheen of scarlet. A charming variety with fine long-stemmed blooms. Pkt. 15c; ¼ oz. 60c.

- 142 A new and much improved strain of this popular Beet—True globe in shape with clean smooth skin, and rich purplish red flesh of solid color. Fine grained and very sweet. Retains its fine quality even when 4 or 5 inches in diameter, making it an ideal home garden sort. Pkt. 10c; oz. 25c; $\frac{1}{4}$ lb. 60c; lb. \$1.75.

Bush Lima— Dreer's Wonder

Very desirable on account of its earliness and productiveness. The plants are of strong, upright bush growth. They are completely covered with large pods, many of which contain four beans fully as large as those of the pole limas. The beans are flat and broad, and pronounced by many as being superior in flavor to the round, thick-seeded varieties. On account of its unusual earliness, Dreer's Wonder Bush Lima can be planted well on in the season without much risk of failure.

Pkt. 10c; $\frac{1}{2}$ lb. 25c; lb. 40c; 2 lbs. 75c; 5 lbs. \$1.75.

179 Sprouting Broccoli "Calabrese"

This fine vegetable is now to be seen in all better produce stores and markets, and is always in good demand. It gives a welcome change from the usual "greens," and its distinctive flavor and high tonic qualities merit for it space in every garden. Of easy culture. Can be grown for an early crop, starting seeds in hotbed or greenhouse in February or March and later transplanting the same as Cabbage, or it succeeds equally well when grown for fall use, sowing seed in the open bed in May and transplanting later thirty inches apart each way. Pkt. 15c; $\frac{1}{4}$ oz. 50c; oz. 90c; $\frac{1}{4}$ lb. \$3.00.

Lyons Swiss Chard

Swiss Chard—Lyons

- 169** An excellent and most useful vegetable, a row or two of which should be in every garden. This variety will quickly produce plants from which leaves may be cut all summer. You can cut right down to the ground and new shoots will soon spring up and make a fast growth. Those plants which are allowed to grow will make large crumpled and curly dark green leaves with thick, white mid-ribs which are delicious when cooked and served like asparagus, while the leafy parts make excellent "greens." Pkt. 10c; oz. 20c; $\frac{1}{2}$ lb. 45c; lb. \$1.25.

Dreer's Giant Globe Cabbage

Cabbage—Dreer's Giant Globe

- 201** For those of our customers who desire a very large Cabbage we offer this new variety. It forms an immense solid head, and under favorable conditions of soil and sufficient moisture often reaches a weight of 30 pounds. The interior is white and very solid, and we would class it as a second early, much used for late planting. Splendid for sauer-kraut on account of its large size and fine white interior quality. Pkt. 15c; $\frac{1}{2}$ oz. 40c; oz. 75c; $\frac{1}{2}$ lb. \$2.00.

Cabbage—Golden Acre

- 204** This excellent variety is the earliest round-headed Cabbage. It will mature at least 7 days ahead of the earliest strains of Jersey Wakefield, considered the standard Early of the country. The heads of Golden Acre Cabbage are perfectly round, firm, and of exceptionally fine texture, heavy mid-ribs being entirely absent. They average in weight about 4 pounds and produce very few outer leaves, permitting close planting in the row. Pkt. 15c; $\frac{1}{2}$ oz. 40c; oz. 75c; $\frac{1}{2}$ lb. \$2.00.

Chinese Cabbage—Impr'd Peking

- 223** This fine salad vegetable resembles Cos Lettuce. The head is long and compact, and all but the outer leaves blanch a creamy white. Very crisp and tender, and in every way adapted to the home garden. We have recently secured a much improved strain and recommend a trial. Pkt. 10c; $\frac{1}{2}$ oz. 25c; oz. 40c; $\frac{1}{2}$ lb. \$1.00.

Cauliflower—Dreer's Super Strain Snowstorm

- 261** This has again been brought to the highest point of perfection through the most careful reselection of plants by our seed growers in Denmark. It has been tried by our customers in many sections and they all agree that it is the best they ever grew. The plants are compact, with short outer leaves and can be planted as close as 2 feet apart each way. It always makes a fine, large, and exceedingly beautiful snowy white head. Matures much earlier than any other variety and is a sure prize-winner at Fairs or Exhibitions. Pkt. 25c; $\frac{1}{2}$ oz. \$1.75; $\frac{1}{2}$ oz. \$3.00; oz. \$5.50.

Celery—Golden Plume

- 274** A large early Celery of superfine quality and splendid appearance. Large heavy stalks with a full, solid heart of golden yellow. Easy to blanch, a good keeper, and always of the crisp, brittle, and nutty quality so much desired. Shows a marked resistance to blight, so often affecting other early yellow strains. This and our special strain of Easy Blanching, offered on page 18 we consider the two finest Celeries in cultivation. Pkt. 25c; $\frac{1}{2}$ oz. \$1.00; $\frac{1}{2}$ oz. \$1.75; oz. \$3.00.

Sugar Corn—Golden Cream

- 320** Also known as Golden Country Gentleman. A cross of Country Gentleman and Golden Bantam with irregularly arranged, shoe-peg like kernels of yellow color. The ears are ready for use in 85 to 90 days after sowing. Grains are long and pointed, rich cream color when ready, but turn to an attractive light golden yellow when cooked. Remarkably sweet, tender, and tasty. Stalks make a healthy, rapid growth, producing an average of three ears each. Pkt. 10c; $\frac{1}{2}$ lb. 25c; lb. 40c; 2 lbs. 70c; 5 lbs. \$1.65.

Cucumber—Longcu

- 383** A fancy Cucumber growing 12 or 13 inches in length with rich deep green skin and few spines. It equals in appearance the greenhouse product. Longcu is suited well to both outdoor and under glass production, and it is specially valuable outside on account of its surprising earliness. It can be picked along with Early Fortune and other early slicing sorts if the growing conditions are anywhere favorable. Pkt. 15c; $\frac{1}{2}$ oz. 35c; oz. 50c; $\frac{1}{2}$ lb. \$1.50; lb. \$5.00.

Endive—Dreer's Giant Fringed

- 412** Endive is highly esteemed for table use because of its appetizing flavor and wholesomeness. In some sections can be grown all the year round. The above sort is a strong growing variety with a large white heart and broad stems, good for fall and winter. On account of the beautifully curled and finely cut leaves this variety is used freely for garnishing as well as making a delicious salad. Pkt. 10c; oz. 25c; $\frac{1}{2}$ lb. 65c.

Dreer's "All Heart" Lettuce

Lettuce—Dreer's "All Heart"

- 440** The name of this variety is most descriptive, because the few loose outer leaves enclose a head that is one large solid heart. Now thoroughly tested in all soils and sections, we have yet to hear of an instance where Dreer's All-Heart Lettuce did not come through with flying colors. While suitable for summer use in cool sections, it is pre-eminently an early spring variety and gives best results in soils holding an abundance of humus or other quickly available plant food. The heads are of delicate yellowish green color, making it a most attractive market variety. The flavor is excellent. Pkt. 10c; $\frac{1}{2}$ oz. 25c; oz. 35c; $\frac{1}{4}$ lb. \$1.00.

Lettuce—Dreer's Improved Hanson

- 462** Although introduced by us over fifty years ago, this Lettuce is still the prize winner among the crisp-heading varieties. The fact that it has been popular for half a century, and that it is still offered by the leading seedsmen of the country is proof of its sterling qualities. It reaches a large size, with light green, curled leaves with fringed edges enclosing a white heart of remarkable solidity. Crisp and brittle all over, and free of the flat watery taste which some crispheads unfortunately have. We recommend it highly for growing during the hot summer months. Pkt. 10c; $\frac{1}{2}$ oz. 20c; oz. 30c; $\frac{1}{4}$ lb. 90c.

Honey Rock Muskmelon

Muskmelon—Honey Rock

- 509** A new salmon-fleshed variety of delicious sweetness and rich aroma. While the almost round melons are only of medium size, this is fully compensated by the remarkably thick flesh and small seed cavity. Skin is roughly netted and of a grey green color. Pkt. 15c; oz. 25c; $\frac{1}{4}$ lb. 60c; lb. \$1.75.

Muskmelon Hearts of Gold or Imp'd Hoodoo

- 505** The vines make a strong and vigorous growth. They are remarkably disease-resistant and produce a wonderful crop of delightfully flavored fruits. The melons are of medium size, round, and distinctly ribbed. They present a most attractive appearance. The firm rind is thickly netted. The flesh is rich deep orange, fine grained, and moderately firm, enclosing a very small seed cavity. Of remarkable sweetness and spicy flavor. Pkt. 10c; oz. 25c; $\frac{1}{4}$ lb. 60c; lb. \$1.75.

Onion—Prizetaker

- 578** The large size and handsome appearance of this Onion make it equally desirable for the home garden or for market. The true Prizetaker Onion is globe-shaped, has pale yellow skin, and white flesh, which is very mild and of delicate flavor. No sets are required, as the large Onions are grown the first year from seed sown during the spring, thus making it a very desirable Onion for the home garden. It also is a good variety for sowing under glass in February for transplanting. When started in this manner immense bulbs can be raised to perfection. Pkt. 10c; $\frac{1}{2}$ oz. 20c; oz. 30c; $\frac{1}{4}$ lb. 85c; lb. \$3.00.

Dreer's Dwarf Perfection Parsley

Parsley—Dreer's Dwarf Perfection

- 600** Easily the most perfect strain of this fine dwarf Parsley. The growth is even and compact, and the exquisitely fine and prettily curled leaves are set very close on the plant. The color is a wonderful bright pea-green. This variety combines the quality of a fine culinary herb with that of a beautiful decorative plant, and is equally valuable for garnishing purposes and border. It surpasses all other varieties of Parsley with its rich yet mild flavor. Pkt. 10c; oz. 25c; $\frac{1}{4}$ lb. 70c; lb. \$2.25.

Pea—"The President"

- 702** Here is a new Pea of outstanding quality which we are sure will be well received by our many customers. "The President" produces a vine 20 to 22 inches high. The vines are strong and vigorous, and of a rich dark green color. They bear a profusion of straight, dark green pods which measure $4\frac{1}{2}$ to $4\frac{3}{4}$ inches in length and always are well filled with sweet-flavored peas. Peas are ready for picking in about 68 to 70 days. It is therefore a most valuable sort to plant along with Laxtons Progress, which can be picked 7 or 8 days earlier. A trial pound or two will return a very profitable crop. Pkt. 10c; $\frac{1}{2}$ lb. 25c; lb. 40c; 2 lbs. 75c; 5 lbs. \$1.75.

Prince
Edward Pea

Pea—Prince Edward

- 690** This main crop Pea is somewhat similar to Telephone in height of vine and shape of pod, also in time of maturity but the pods of this sort are much darker green in color adding greatly to their handsome appearance, and we believe the vines carry more peas. Height of vine is about 4 feet and some support insures a heavy growth which is literally loaded down with well-filled pods. Quality, needless to say, is fully equal to the well known Telephone. Pkt. 10c; $\frac{1}{2}$ lb. 25c; lb. 40c; 2 lbs. 75c; 5 lbs. \$1.75.

Pepper—Early Giant

- 723** Early Giant fills a distinctive need as it will mature in sections too cold to grow any other large pepper. If you have been restricted to any of the smaller early types because of a short season, you will find Early Giant a remarkable improvement. The fruits are 4 inches thick and from $4\frac{1}{4}$ to 5 inches high. They have very thick flesh of a delightfully mild flavor. The skin turns from a rich green to a beautiful bright red when fully mature. Pkt. 15c; $\frac{1}{2}$ oz. 50c; oz. 90c; $\frac{1}{4}$ lb. \$3.00.

Bloomsdale
Long-Standing
Savoy Spinach

Cardinal Globe Radish

Radish—Cardinal Globe

- 770** Among the small round red Radishes available, this is easily one of the most dependable in that it forms uniformly handsome round globes within 30 days from sowing seeds. The radishes when overgrown show a tendency to become slightly elongated or olive-shaped, but they remain in fit condition for use about a week or ten days longer than the average extra early, round red variety. Brilliant cardinal red skin and pure white flesh of delicate crispness and delightful flavor. Fine for growing under glass in frames or greenhouses as well as for early outdoor sowing. Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 50c; lb. \$1.50.

Tomato—Pritchard (Scarlet Topper)

- 940** The introduction of this excellent variety a couple of years ago must be credited to the valuable breeding work performed by the late Dr. F. J. Pritchard of the U. S. Dept. of Agriculture. It is a fine early Tomato with large smooth globular fruits, ripening to a clear scarlet right up to the stem. The flesh is rich deep red with few seeds and no core. Vine grows erect and is well foliaged. Like all Tomato varieties this sort amply repays liberal fertilizing, and in our opinion Pritchard is worth a place in any garden. Pkt. 20c; $\frac{1}{2}$ oz. 40c; oz. 70c; $\frac{1}{4}$ lb. \$2.00.

Pritchard Tomato

Spinach— Bloomsdale Long-Standing Savoy

- 849** An early, hardy, dark glossy green sort; leaves crumpled and heavily savoyed. Combines all of the good qualities of the best Savoy strain with remarkable long-standing properties. The illustration shown above is made from an actual photo and shows clearly the excellent type of plant produced from our superior strain of seed. Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 30c; lb. 85c.

Planted in pots they may be flowered in the house during the early spring months. 35c each; \$3.50 per doz.

Mexican Everblooming
Tuberose

These are universally popular for outdoor bedding, and considering their many good qualities there is no cause for surprise to see them cultivated so extensively. They produce a lavish profusion of blooms giving color, life, and beauty to the garden just at a time when other plants have been destroyed by frost and are looking their worst. Frost does not materially affect their flowering and it frequently happens that armfuls of blooms can be cut late in November. They are reasonably hardy if planted in a well drained position and covered with leaves or loose litter during the winter. Or they may be carried over with perfect safety in a cold frame.

Wonderful improvements have been made in Garden Chrysanthemums during the past 20 years. The blooming period has been advanced so we have varieties that begin flowering in September. All of the sorts offered by us come into perfection before the end of October. Colors also have been enhanced and we now have them ranging from pure white through pink, yellow, and red, to deep purple and bronze.

U. S. Plant Patent No. 67

(Howard and Smith, 1933)

The buds, the expanding flowers, as well as the fully developed blooms of this Rose are absolutely perfect in every stage of development. This is due to the unfurling petals of the long, pointed buds which are arranged in spiral form, reflexing as they unfold, giving the fully developed flower, which is from five to six inches in diameter, a most perfect Camellia-like formation. Aside from its beautiful shape it is a Rose of exceptional keeping qualities, the cut blooms lasting fully a week in good condition.

Color: In color it is a luscious shade of cherry-rose overlaid with a scarlet glow. Its brilliance is particularly intense and lustrous under artificial light. An unusual feature in the coloring is that each petal is bordered with a faint but distinct silver edging.

Fragrance: We have in this Rose the most delightful fragrance (an important factor that is lacking in many other good varieties), which is so intense that only a few flowers in a vase will serve to permeate the entire atmosphere of the room with their sweet fruity odor, like that of the old Roses of fifty years ago.

Growth: Strong, vigorous, erect, branching. A very free and a continuous bloomer.

\$1.50 each; \$15.00 per doz.

Before April 1st we supply dormant Roses which are free from soil They are sent "Prepaid."

Dreer's Roses *for the Garden*

All our Roses are strong, two-year-old, field-grown plants carefully dug in the fall, planted in pots, and stored in a cold greenhouse or cold frame until the latter part of March when they are moved to beds in the open ground where they receive no further protection. This procedure insures the finest stock for your purpose, much superior to that carried over winter in cellars or cold storage. Orders placed with us for dormant Roses for delivery on or before April 1, will be sent charges prepaid to any address in the U. S. These dormant Roses are sent without pots and they are freed from soil. **After April 1, we supply potted plants only** on which the buyer pays transportation charges.

Its large trusses of white flowers are followed in summer by an abundance of brilliant orange-scarlet berries, which, remaining on the plants throughout the winter produce a gorgeous effect.

Field-grown plants of Pyracantha are very difficult to transplant; the stock we offer has therefore been grown in pots and can be planted now with perfect success. Strong 6-inch pots, \$1.00.

Dreer's Celebrated Lawn Grass Seed

The special Dreer Brands of Lawn Grass Mixtures are noted for their adaptability to various situations and soil conditions. They are used in every section of the country for making private lawns and also on the grounds of many leading Country Clubs, Athletic Clubs, Schools, Institutions, etc. These mixtures have long enjoyed an enviable reputation for their excellence, and it will always be our aim to maintain the high quality by the use of only the finest re-cleaned grasses as free from all impurities as the most modern machinery can make them. Dreer's Grass Seed Mixtures are more than a product of nature. They are the result of selection and cleaning, of experience and integrity. Dreer's Celebrated Lawn Grass Mixtures never contain any cheap annual grasses, such as Timothy, which give quick but only temporary results. And they never contain a large percentage of worthless chaff, which in some grass seed mixtures sold principally upon "price" runs as high as 50 per cent. **Quantity of Lawn Grass Seed to Sow.** One quart is sufficient for 200 square feet (10 by 20 feet); 6 bushels are required to sow one acre. For renovating old lawns use one half of these quantities.

The Dreer Lawn Grass

An Unequalled Mixture for a Beautiful Lawn

The first and most important requisite for the establishment of a really good lawn is the correct choice of grass seed varieties which make a dwarf compact growth and have a rich deep green color. The Dreer Lawn Grass has been carefully prepared in accordance with our own formula which has proved to give a rich green, smooth, velvety lawn of fine texture altogether free from grasses which are inclined to produce clumps or knots. The grasses included are permanent and of good color. They are all strictly lawn grasses.

Each variety of grass in this composition is included for a special purpose. The strong fibrous roots of certain ones take hold of the soil and contribute considerably toward the permanence of the sod. Other grasses in the mixture are of a creeping habit. They are most essential as they quickly fill up the entire surface and weave the sod into a thick carpet of green. And there are others which help the density and protect the lawn against rain damage. The Dreer Lawn Grass is the ideal mixture for small and large lawns.

Pt. 25c; qt. 45c; 2 qts. 85c; 4 qts. \$1.40; peck \$2.50, prepaid.
Not prepaid, $\frac{1}{2}$ bu. (10 lbs.) \$4.50; bu. (20 lbs.) \$9.00; 100 lbs. \$44.00.

"Shady Place" Lawn Grass

Usually it is quite difficult to obtain a satisfactory growth of grass under trees and in shady places. The grasses used in this formula are all well adapted for growing in shade. As it blends well with our regular Lawn Grass Mixture it may be used on those portions of the lawn which are shaded by trees, buildings, etc., thus covering the whole area with a rich green sward. In spring give a light reseed, then a top dressing of finely screened soil or sand, together with "Bovung" or Bone Meal, to repair the damage done by the winter rains. Pt. 25c; qt. 45c; 2 qts. 85c; 4 qts. \$1.40; peck, \$2.50, prepaid. Not prepaid, $\frac{1}{2}$ bu. (10 lbs.) \$4.50; bu. (20 lbs.) \$9.00; 100 lbs. \$44.00.

Fairmount Park Lawn Grass

Our Popular Low-Priced Mixture

This popular, low-priced mixture is well suited for various soil conditions, giving good results even on small city grass plots, where the soil is frequently stiff and heavy. It will form a thick turf in a very short time and is well suited for lawns and other spaces receiving considerable hard wear. It is also valuable for use on embankments and terraces, also for renovating old, worn-out lawns.

Pt. 15c; qt. 25c; 2 qts. 50c; 4 qts. 95c; peck \$1.75, prepaid.
Not prepaid, $\frac{1}{2}$ bu. (10 lbs.) \$3.00; bu. (20 lbs.) \$6.00; 100 lbs. \$28.00.

The Lawn (Dickinson). A helpful book containing simple, practical directions that everyone can follow. It gives the latest and most up-to-date information on making the lawn. \$1.25, postpaid.
